

# Petition for Fair Trade

## Add Your Voice to Protect Toys & Hobbies

The toy and hobby industry is facing unprecedented pressure from new tariffs—some as high as 245%—threatening product affordability, small business survival, and the creative play these items bring to families across the country.

By signing this petition, you're calling on federal policymakers to support fair, targeted trade policies that protect access to model trains, puzzles, craft kits, educational toys, and more.

This is **not a political statement**—it's a shared message from consumers, retailers, and communities who care about keeping toys and hobbies **affordable, accessible, and American**.

Thank you for your support.

We, the undersigned, support fair and reasonable trade policies that protect non-sensitive toy and hobby products from excessive tariffs.

We believe in supporting small businesses, protecting American jobs, and ensuring families can continue to enjoy affordable, educational, and creative products.

This is **not a political petition**, but a call for practical, balanced trade solutions.
